

```
//example 2.10(b)//  
//find 2's complement of binary number//  
clc  
//clears the window//  
clear  
//clears all the existing variables//  
x=00110101  
//the number//  
xd=bin2dec('00110101')  
//binary to decimal conversion//  
xc=bitcmp(xd,8)  
//one's complement of the number//  
xp=xc+1  
xc1=dec2bin(xp)  
//2's complement of the number//  
disp('2s complement of 00110101 is : ')  
disp(xc1)  
//answer in 2's complement form//
```

Answer=(11001011)₂
