```matlab
//example 2.11(b)//
//find 2's complement of binary number//
clc
//clears the window//
clear
//clears all the existing variables//
x=10010010
//the number//
xd=bin2dec('10010010')
//binary to decimal conversion//
xc=bitcmp(xd,8)
//one's complement of the number//
xp=xc+1
xc1=dec2bin(xp)
//2's complement of the number//
disp('2s complement of 10010010 is : ')
disp(xc1)
//answer in 2's complement form//
```

Answer=(01101110)
