

```
//example 2.15//  
//subtraction of two binary number//  
clc  
//clears the screen//  
clear  
//clears the existing variables//  
x=bin2dec('1011')  
//x is the minuend//  
//binary to decimal conversion//  
y=bin2dec('0110')  
//y is the subtrahend//  
z=x-y  
//subtraction//  
disp('the subtraction of given numbers is:')  
ans=dec2bin(z)  
//decimal to binary conversion//  
disp(ans)  
//answer in binary form//
```

Answer=(0101)
