Book Description

Title: Fundamentals Of Physical Chemistry

Author: H. D. Crockford, J. W. Nowell, H. W. Baird And F. W. Getzen

Publisher: John Wiley And Sons Inc.

Edition: 1

Year: 1950

ISBN: 978-0471188445

Scilab numbering policy used in this document and the relation to the above book.

Exa Example (Solved example)

Eqn Equation (Particular equation of the above book)

AP Appendix to Example(Scilab Code that is an Appednix to a particular Example of the above book)

For example, Exa 3.51 means solved example 3.51 of this book. Sec 2.3 means a scilab code whose theory is explained in Section 2.3 of the book.

Contents

List of Scilab Codes	5
2 Gases	8
3 Liquids	14
4 Solutions Nonelectrolytes	17
5 Solutions Osmotic Pressure	22
6 Solutions Solutions of Electrolytes	24
7 Conductivity	26
8 Chemical Equilibrium	30
9 Ionic Equilibria and Buffer Action	33
10 Electromotive Force	42
11 Thermodynamics Some Basic Concepts	47
12 Thermodynamics Thermodynamic chemistry	50
13 Thermodynamics Entropy and Free Energy	53
14 Determination of hydronium ion Concentrations	60
16 Oxidation Reduction potentials	63

17 Speed of Reaction Catalysis	65
20 Radiochemistry	67
