Book Description

Title: Industrial Instrumentation

Author: K. Krishnaswamy And S. Vijayachitra

Publisher: New Age International Publishers, New Delhi

Edition: 2

Year: 2010

ISBN: 978-81-224-2750-9

Scilab numbering policy used in this document and the relation to the above book.

Exa Example (Solved example)

Eqn Equation (Particular equation of the above book)

AP Appendix to Example(Scilab Code that is an Appednix to a particular Example of the above book)

For example, Exa 3.51 means solved example 3.51 of this book. Sec 2.3 means a scilab code whose theory is explained in Section 2.3 of the book.

Contents

List of Scilab Codes	4
1 Temperature	5
2 Pressure	11
3 Force Torque and Velocity	18
4 Acceleration Vibration and Density	23
5 Flow	29
6 Level	39
7 Viscosity Humidity and Moisture	45
8 Fundamentals of measuring instruments	52

List of Scilab Codes

Exa 1.1	Temperature Conversion	5
Exa 1.2	percentage Accuracy and Error	5
Exa 1.3	Two wire RTD	6
Exa 1.4	Thermocouple temperature measurement	7
Exa 1.5	Hot junction temperature of thermocouple	7
Exa 1.6	Caliberation of an instrument	7
Exa 1.7	Wall temperature measurement	8
Exa 1.8	Thermocouple output	8
Exa 1.9	electronic temperature transmitter	9
Exa 2.1	Pressure conversion	11
Exa 2.2	Gauge and absolute pressure	12
Exa 2.3	Gauge and absolute pressure	12
Exa 2.4	pressure measurement using U tube manometer	13
Exa 2.5	Specific Gravity and weight density	13
Exa 2.6	water flow rate using mercury manometer	14
Exa 2.7	readings and errors in Bourdon gauge reading	14
Exa 2.8	Specific Gravity and density of liquid	15
Exa 2.9	strain gauge wire length and cross section area	15
Exa 2.10	Capacitance calculation for variable dielectric	16
Exa 2.11	pressure gauge caliberation	17
Exa 2.12	pressure calculation using McLeod gauge	17
Exa 3.1	Force calculation	18
Exa 3.2	Weight calculation	18
Exa 3.3	calculation of specific gravity	19
Exa 3.4	Estimation of uncertainty due to sensitivity	19
Exa 3.5	Torque Calculation	20
Exa 3.6	Force calculation	20
Exa 3.7	resistance strain gauge	20

Exa 3.8	speed measurement using stroboscope	21
Exa 3.9	speed measurement using proximity	22
Exa 4.1	mechanical system for a seismic instrument	23
Exa 4.2	Frequency and phase angle of motion	23
Exa 4.3	time calculation for exponential transient term	24
Exa 4.4	Acceleration measurement	24
Exa 4.5	output voltage of quartz piezoelectric crystal	25
Exa 4.6	Differential values of capacitor	25
Exa 4.7	Specific Gravity Conversion	26
Exa 4.8	calculation of the volume of displacer	26
Exa 4.9	Differential pressure Sensor	27
Exa 4.10	Specific Gravity of unknown liquid	27
Exa 4.11	calculation of specific gravity	28
Exa 5.1	flow rate calculation	29
Exa 5.2	Volumetric flow rate calculation	29
Exa 5.3	Nominal flow velocity	30
Exa 5.4	pressure difference calculation	30
Exa 5.5	volume flow rate for orifice and venturi Tubes	31
Exa 5.6	determination of Reynolds number	32
Exa 5.7	Fluid velocity and Volumetric flow rate	33
Exa 5.8	Fluid velocity calculation	33
Exa 5.9	velocity measurement using pilot tube	33
Exa 5.11	determination of flow velocity	34
Exa 5.12	calculation of flying speed of aircraft	34
Exa 5.13	Maximum fluid handling capacity of Rotameter	34
Exa 5.14	Determination of range of flow for ratameter	35
Exa 5.15	calculation of coal delivery for coal conveyor system	36
Exa 5.16	Fluid velocity calculation	36
Exa 5.17	volume flow rate	37
Exa 5.18	induced emf in electromagnetic flow meter	37
Exa 5.19	velocity of flow in electromagnetic flow meter	37
Exa 5.20	average velocity of flow in electromagnetic flow meter	38
Exa 6.1	output current of two wire pressure transmitter	39
Exa 6.2	water level and current at different positions	40
Exa 6.3	Differential pressure output at different levels	40
Exa 6.4	Displacer with spring balance	41
Exa 6.5	Buoyancy Force calculation	42
Exa 6.6	Determination of displaced volume from Buoyancy Force	42

Exa 6.7	Determination of hydrostatic pressure in open tank . .	43
Exa 6.8	Determination of hydrostatic pressure in closed tank .	43
Exa 6.9	Determination of height from hydrostatic pressure . .	43
Exa 6.10	calculation of level on the probe	44
Exa 7.1	calculation of absolute viscosity	45
Exa 7.2	calculation of kinematic relative and absolute viscosity	45
Exa 7.3	Absolute viscosity of the Newtonian fluid	46
Exa 7.4	kinematic viscosity and density calculation	47
Exa 7.5	Kinematic Viscosity in Saybolts Universal viscometer .	47
Exa 7.6	calculation of absolute viscosity	48
Exa 7.7	calculation of relative humidity	48
Exa 7.8	calculation of Relative Humidity dew point and mois- ture content	49
Exa 7.9	calculation of relative humidity	49
Exa 7.10	percentage relative humidity	50
Exa 7.11	percentage increase in moisture content	50
Exa 7.12	calculation of moisture content	51
Exa 8.1	Flux density calculation	52
Exa 8.2	Power Dissipation and accuracy of result	52
Exa 8.3	max and min levels of input supply current	53
Exa 8.4	Time constant for thermometer	53
Exa 8.5	Error calculation of second order instrument	54
Exa 8.6	Output of first order instrument for unit step input . .	54
Exa 8.7	Calculation of different parameters from given frequency distribution	55
Exa 8.8	Calculation of damping coefficient and natural frequency for 2nd order instrument	56
Exa 8.9	calculation of Amplitude inaccuracy and phase shift from transfer function	56
Exa 8.10	temperature and altitude calculation from first order thermometer placed in balloon	57
