# Book Description

**Title:** Fluid Mechanics

**Author:** R. H. F. Pao

**Publisher:** John Wiley and Sons

**Edition:** 2

**Year:** 1995

**ISBN:** 0486683567

Scilab numbering policy used in this document and the relation to the above book.

**Exa** Example (Solved example)

**Eqn** Equation (Particular equation of the above book)

**AP** Appendix to Example(Scilab Code that is an Appednix to a particular Example of the above book)

For example, Exa 3.51 means solved example 3.51 of this book. Sec 2.3 means a scilab code whose theory is explained in Section 2.3 of the book.

# Contents

List of Scilab Codes	4
2 Fluid Statics	5
3 Fluid Kinematics	11
4 Fluid Dynamics	13
5 Fluid Viscosity and Flow of real fluids	24
6 Dimensional Analysis and Model similitude	28
7 Flow of In compressible fluids in closed conduits	30
8 Fluid Compressibility and Compressible Flow	43
9 Fluid flow about Immersed Bodies	55
10 Dynamic Lift	62
11 Flow of Liquids in Open Channels	66
