Book Description

Title: Fluid Mechanics

Author: A. K. Choudhary and Om Prakash

Publisher: S. K. Kataria & Sons, New Delhi

Edition: 2

Year: 2009

ISBN: 81-85749-65-5

Scilab numbering policy used in this document and the relation to the above book.

Exa Example (Solved example)

Eqn Equation (Particular equation of the above book)

AP Appendix to Example(Scilab Code that is an Appednix to a particular Example of the above book)

For example, Exa 3.51 means solved example 3.51 of this book. Sec 2.3 means a scilab code whose theory is explained in Section 2.3 of the book.

Contents

List of Scilab Codes	4
2 Properties of Fluids	5
3 Hydro Static Pressure	10
4 Measurement of Pressure	28
5 Fundamentals of Flow	37
6 Orifices	55
7 Flow through pipes	68
11 Flow Measurement	86

List of Scilab Codes

Exa 2.1	Sp Weight Mass density Sp Gravity	5
Exa 2.2	Bulk modulus of elasticity	6
Exa 2.3	Increase of pressure	6
Exa 2.4	Force and power required	7
Exa 2.5	Kinematic Viscosity	7
Exa 2.6	Calculate capillary rise	8
Exa 2.7	Intensity of Pressure	8
Exa 3.1	Intensity of pressure	10
Exa 3.2	Intensity of pressure	10
Exa 3.3	Depth of alcohol	11
Exa 3.4	Convert pressure head	12
Exa 3.5	Calculate total pressure	12
Exa 3.6	Calculate force on vertical wall	13
Exa 3.7	Find force and depth	14
Exa 3.8	Total pressure and centre of pressure	15
Exa 3.9	Total pressure and centre of pressure	15
Exa 3.10	Total pressure and centre of pressure	16
Exa 3.11	Total pressure and centre of pressure	17
Exa 3.12	Determine total pressure	18
Exa 3.13	Total pressure and centre of pressure	18
Exa 3.14	Force and reaction at hinge	19
Exa 3.15	Horizontal force	20
Exa 3.16	Total pressure and centre of pfressure	21
Exa 3.17	Total pressure and centre of pressure	21
Exa 3.18	Total Pressure and centre of pressure	22
Exa 3.19	Total pressure and centre of pressure	23
Exa 3.20	Total hydro static pressure and centre of pressure	23
Exa 3.21	Resultant pressure and direction	24

Exa 3.22	Resultant pressure and angle of pressure	25
Exa 3.23	Horizontal and vertical components of pressure	26
Exa 3.24	Maximum and minimum stress	26
Exa 4.1	Gauge units and absolute units	28
Exa 4.2	Pressure intensity and tube reading	29
Exa 4.3	Convert pressure head	30
Exa 4.4	Pressure in the tube	30
Exa 4.5	Pressure intensity of liquid	31
Exa 4.6	Calculate Pressure intensity	32
Exa 4.7	Calculate pressure intensity	32
Exa 4.8	Difference of pressure head	33
Exa 4.9	Difference of Pressure	33
Exa 4.10	Pressure difference between two vessels	34
Exa 4.11	Difference of pressure between two vessels	34
Exa 4.12	Pressure difference between vessels	35
Exa 4.13	Reading of manometer	35
Exa 4.14	Difference of pressure	36
Exa 5.1	Find Power required	37
Exa 5.2	Discharge and velocity of flow	37
Exa 5.3	Datum Velocity Head Pressure head	38
Exa 5.4	Calculate total energy	39
Exa 5.5	Direction of flow	39
Exa 5.6	Pressure at the low end	40
Exa 5.7	Loss of head and direction of flow	41
Exa 5.8	Find Loss of head	43
Exa 5.9	Head Loss and direction of flow	43
Exa 5.10	Determine pressure intensity	44
Exa 5.11	Intensity of pressure and discharge	45
Exa 5.12	Find discharge of oil	46
Exa 5.13	Coefficient of meter	47
Exa 5.14	Deflection in manometer	48
Exa 5.15	Find pressure difference	48
Exa 5.16	Deflection of oil mercury gauge	49
Exa 5.17	Rate of flow	50
Exa 5.18	Calculate flow water	50
Exa 5.19	Flow rate of water	51
Exa 5.20	Velocity and flow rate	52
Exa 5.21	Flow rate of oil	52

Exa 5.22	Find Z	53
Exa 5.23	Discharge in the pipe	54
Exa 6.1	Calculate Coefficients	55
Exa 6.2	Calculate various Coefficients	56
Exa 6.3	Coefficient of velocity	56
Exa 6.4	Coefficient of velocity	57
Exa 6.5	Various hydraulic coefficients	57
Exa 6.6	Various hydraulic coefficients	58
Exa 6.7	Coefficient of discharge	59
Exa 6.8	Coefficients of orifice	59
Exa 6.9	Various hydraulic coefficients	60
Exa 6.10	Meeting point of two jets	61
Exa 6.11	Discharge through the orifice	62
Exa 6.12	Discharge through orifice	62
Exa 6.13	Calculate percentage error	63
Exa 6.14	Discharge through orifice	63
Exa 6.15	Discharge through orifice	64
Exa 6.16	Find time taken	65
Exa 6.17	Time of emptying the tank	65
Exa 6.18	Time required to bring down the level	66
Exa 6.19	Time required to empty the tank	67
Exa 7.1	Relation between CGS and MKS unit	68
Exa 7.2	Kinematic viscosity and Reynolds number	69
Exa 7.3	Calculate reynolds number	70
Exa 7.4	Head Lost due to friction	70
Exa 7.5	Difference in elevations	71
Exa 7.6	Head Lost due to friction	71
Exa 7.7	Loss of head due to friction	72
Exa 7.8	Various losses	72
Exa 7.9	Intensity of pressure	74
Exa 7.10	Diameter of pipe	74
Exa 7.11.a	Discharge and velocity	75
Exa 7.11	Calculate the pressure	76
Exa 7.12	Discharge through 300mm pipe	77
Exa 7.13	Discharge in pipe line	78
Exa 7.14.a	Diameter of pipe line	78
Exa 7.14	Discharge in pipe line	79
Exa 7.15.a	Difference in water level	80

Exa 7.15	Rate of flow and diameter	81
Exa 7.16	Discharge through pipe	81
Exa 7.17	Velocity discharge rate and energy	82
Exa 7.18	Discharge in pipe and pressure	83
Exa 7.19.a	Maximum Power	84
Exa 7.19	Increase in pressure Intensity	84
Exa 11.1	Velocity of flow	86
Exa 11.2	calculate Velocity	86
Exa 11.3	Rate of discharge of steam	87
Exa 11.4	Find the discharge	88
Exa 11.5	Find the discharge	88
Exa 11.6	Discharge over the notch	89
Exa 11.7	Position of apex of notch	89
Exa 11.8	calculate time taken	90
Exa 11.9	Discharge flowing over the weir	90
Exa 11.10	Find the discharge	91
Exa 11.11	Discharge over cipoletti weir	92
Exa 11.12	Find the maximum discharge	92
Exa 11.13	Number of spillway	93
Exa 11.14	Calculate the discharge	93

Chapter 2

Properties of Fluids

Scilab code Exa 2.1 Sp Weight Mass density Sp Gravity

```
1 //Example 2.1
2 clc;
3 clear;
4 close;
5
6 //Given data :
7 V=10; //in m^3
8 W=80; //in kN
9 g=9.81; //gravity accelerat
10 w_water=9.81; //specific weight of water
11 format('v',6);
12 w=W/V; //specific weight in kN/m^3
13 disp(w," Specific weight of liquid in kN/m^3 : ");
14 mass_density=w*1000/g; //kg/m^3
15 disp(mass_density,"Mass density of liquid in kg/m^3
   : ");
16 specific_gravity=w/w_water; //unitless
17 disp(specific_gravity," Specific gravity : ");
```

Scilab code Exa 2.2 Bulk modulus of elasticity

```
1 //Example 2.2
2 clc;
3 clear;
4 close;
5
6 //Given data :
7 p1=750; //N/cm^2
8 p2=1400; //N/cm^2
9 dvBYV=-0.150; //in %
10 format('v',9);
11 dp=p2-p1; //in N/cm^2
12 dp=dp*10^4; //in N/m^2
13 K=-dp/(dvBYV/100); //N/m^2
14 disp(K,"Bulk modulus(N/m^2) : ");
```

Scilab code Exa 2.3 Increase of pressure

```
1 //Example 2.3
2 clc;
3 clear;
4 close;
5
6 //Given data :
7 Kwater=2.10*10^6; //kN/m^2
8 Kair=140; //kN/m^2
9 dvBYV=-1; //in %
10 format('v',9);
11 //For Water :
12 dp=-Kwater*dvBYV/100; //kN/m^2
13 disp(dp,"Increase of pressure in water in kN/m^2");
14 //For Air :
15 dp=-Kair*dvBYV/100; //kN/m^2
16 disp(dp,"Increase of pressure in air in kN/m^2");
```

Scilab code Exa 2.4 Force and power required

```
1 //Example 2.4
2 clc;
3 clear;
4 close;
5
6 //Given data :
7 A=0.2; //m^2
8 dy=0.02/100; //m
9 du=20/100; //cm/s
10 mu=0.001; //Ns/m^2
11 tau=mu*du/dy; //in N/m^2
12 F=tau*A; //N
13 disp(F,"Force required in N : ");
14 Power=F*du; //Watts
15 disp(Power,"Power required in W : ");
```

Scilab code Exa 2.5 Kinematic Viscosity

```
1 //Example 2.5
2 clc;
3 clear;
4 close;
5 //Given data :
6 format('e',10);
7 mu=0.1; //Ns/m^2
8 Sp_gravity_liquid=2.1;
9 mass_density_water=1000; //in kg/m^3
10 rho=Sp_gravity_liquid*mass_density_water; //kg/m^3
11 v=mu/rho; //m^2/sec
```

```
12 disp(v,"Kinematic viscosity of liquid in m2/sec : ")
    );
```

Scilab code Exa 2.6 Calculate capillary rise

```
1 //Example 2.6
2 clc;
3 clear;
4 close;
5 //Given data :
6 format('v',6);
7 d=2;//in mm
8 d=d/1000;//in m
9 sigma_water=0.073;//N/m
10 sigma_mercury=0.510;//N/m
11 //Water-glass contact
12 w1=9.81;//kN/m3(specific weight of water)
13 w1=w1*103;//N/m3
14 theta=0;//in degree
15 h=4*sigma_water*cosd(theta)/w1/d;//in mm
16 disp(h*1000,"capillary rise for water glass contact
    in mm : ");
17 //Mercury-glass contact
18 w2=13.6*9.81;//kN/m3(specific weight of mercury)
19 w2=w2*103;//N/m3
20 theta=130;//in degree
21 h=4*sigma_mercury*cosd(theta)/w2/d;//in mm
22 disp(h*1000,"capillary rise for mercury glass
    contact in mm: ");
```

Scilab code Exa 2.7 Intensity of Pressure

```
1 //Example 2.7
```

```
2  clc;
3  clear;
4  close;
5
6  //Given data :
7  format('v',5);
8  d=6; //in mm
9  d=d/1000; //in m
10 sigma=0.0755; //N/m
11 //At equilibrium :  $p \cdot \pi \cdot r^2 = \sigma \cdot 2 \cdot \pi \cdot r$ 
12 r=d/2; //in m
13 p=2*sigma/r; //N/m^2
14 disp(p,"Intensity of pressure in N/m^2 or Pascals :
    ");
```

Chapter 3

Hydro Static Pressure

Scilab code Exa 3.1 Intensity of pressure

```
1 //Example 3.1
2 clc;
3 clear;
4 close;
5 format('v',7);
6 //Given data :
7 D=30*10^-2;//in m
8 F=9810;//in N
9 A=%pi*D^2/4;//in m^2
10 p=F/A;//in N/m^2 or Pa
11 p=p/1000;//kPa
12 disp(p,"Intensity of pressure at the bottom of
        container in kPa : ");
```

Scilab code Exa 3.2 Intensity of pressure

```
1 //Example 3.2
2 clc;
```

```

3 clear;
4 close;
5 format('v',7);
6 //Given data :
7 h=1.5; //in m
8 w_w=9.81; //in kN/m^3
