# Book Description

**Title:** Introduction To Chemical Engineering Thermodynamics

**Author:** J. M. Smith, H. C. Van Ness And M. M. Abbott

**Publisher:** McGraw - Hill Companies Inc., New York

**Edition:** 6

**Year:** 2001

**ISBN:** 0-07-049486-X

Scilab numbering policy used in this document and the relation to the above book.

**Exa** Example (Solved example)

**Eqn** Equation (Particular equation of the above book)

**AP** Appendix to Example(Scilab Code that is an Appednix to a particular Example of the above book)

For example, Exa 3.51 means solved example 3.51 of this book. Sec 2.3 means a scilab code whose theory is explained in Section 2.3 of the book.
