Book Description

Title: Basic Fluid Mechanics

Author: Peerless

Publisher: Pergamon Press

Edition: 1

Year: 1967

ISBN: 978-0080110981

Scilab numbering policy used in this document and the relation to the above book.

Exa Example (Solved example)

Eqn Equation (Particular equation of the above book)

AP Appendix to Example(Scilab Code that is an Appednix to a particular Example of the above book)

For example, Exa 3.51 means solved example 3.51 of this book. Sec 2.3 means a scilab code whose theory is explained in Section 2.3 of the book.

Contents

List of Scilab Codes	4
2 Similarity	6
3 Dimensional Analysis	11
5 Control Volume Analysis	13
6 Steady one dimensional reversible flow	16
7 Steady one dimensional Irreversible flow	22
8 analysis of dimensional constant density laminar flow	30
9 analysis of dimensional constant density turbulent flow	32
10 External flows	34
11 elementary analysis	39
12 TURBOMACHINES	46
13 Hydraulic power transmission	50
14 Further Developments	53
