# Book Description

**Title:** Elementary Fluid Mechanics

**Author:** J. K. Vennard

**Publisher:** John Wiley & Sons, USA

**Edition:** 4

**Year:** 1961

**ISBN:** 9780471905851

Scilab numbering policy used in this document and the relation to the above book.

**Exa** Example (Solved example)

**Eqn** Equation (Particular equation of the above book)

**AP** Appendix to Example(Scilab Code that is an Appednix to a particular Example of the above book)

For example, Exa 3.51 means solved example 3.51 of this book. Sec 2.3 means a scilab code whose theory is explained in Section 2.3 of the book.

# Contents

List of Scilab Codes	4
1 Fundamentals	5
2 Fluid Statics	9
3 Kinematics of Fluid Motion	16
4 Flow of an Incompressible Ideal Fluid	20
5 Flow of a Compressible Ideal Fluid	28
6 The Impulse Momentum Principle	33
7 Flow of a Real Fluid	44
8 Similitude and Dimensional Analysis	48
9 Fluid Flow in Pipes	51
11 Fluid Measurements	62
12 Elementary Hydrodynamics	66
13 Fluid Flow about Immersed Objects	67

# Chapter 1

## Fundamentals

Scilab code Exa 1.1 Chapter 1 Example 1

```
1 clear;
2 clc;
3 //page no.8
4
5 T = 80; //temperature of chlorine gas in degree F
6 p = 100; //pressure in psia
7 W = 2*35.45; //molecular weight of chlorine
8 R = 1545/W; //specific gas constant in ft-lb/lb-
    degreeR
9 gam = p*(144/R)*(1/(460+T)); //specific weight of
    chlorine in lb/cuft
10 Spec_vol = 1/gam; //specific volume in cuft/lb
11 rho = gam/32.2; //density of chlorine in slug/cuft
12 printf('Spec. weight = %.3f lb/cuft\n Spec. volume =
    %.3f cuft/lb\n density = %.4f slug/cuft',gam,
    Spec_vol,rho);
```

---

Scilab code Exa 1.2 Chapter 1 Example 2

```

1 clear;
2 clc;
3 //page no. 12
4
5 funcprot(0);
6 gamma = 1.4;
7 T1 = 60; //temperature of air in degree F
8 p1 = 14.7; //pressure in psia
9 k = 0.5; //((final volume/initial volume) = k
10 R = 53.3; //Engineering gas constant
11 gam1 = p1*(144/R)*(1/(460+T1)); //lb/cuft
12 gam2 = gam1/k; //lb/cuft
13 p2 = (p1/(gam1^(gamma)))*(gam2^(gamma)); // in psia
14 T2 = p2*(144/R)*(1/gam2); //in degree F
15 a1 = sqrt(gamma*32.2*R*(460+T1)); // in fps
16 a2 = sqrt(gamma*32.2*R*(T2)); // in fps
17 printf('Final pressure = %.1f psia\n Final
    temperature = %d degreeR \n Sonic velocity before
    compression = %d fps\n Sonic velocity after
    compression = %d fps ', p2, T2, a1, a2);
18
19 //there are small errors in the answers given in
    textbook

```

---

### Scilab code Exa 1.3 Chapter 1 Example 3

```

1 clear;
2 clc;
3 //page no. 17
4
5 r1 = 0.25; // radius of cylinder in feet
6 l = 2; //length of cylnider in feet
7 r2 = 0.30; // radius of co-axial cylinder in feet
8 mu = 0.018; //lb-sec/ft^2
9 torque = 0.25; // in ft-lb

```

```

10 dv_dy1 = torque/(4*%pi*mu*r1^2); // velocity gradient
    at radius = 0.25 in fps/ft
11 dv_dy2 = torque/(4*%pi*mu*r2^2); // velocity gradient
    at radius = 0.30 in fps/ft
12 V1 = integrate('-torque/(4*%pi*mu*r^2)', 'r', r2, r1);
    // velocity in fps
13 rpm1 = V1*60/(2*%pi*r1);
14 V2 = torque*(r2-r1)/(4*%pi*mu*r1^2); // in fps
15 rpm2 = V2*60/(2*%pi*r1);
16 hp = 2*%pi*r1*(rpm1/(550*60));
17 printf('Velocity gradient at the inner cylinder wall
    is %.1f fps/ft and \n at the outer cylinder wall
    is %.1f fps/ft ', dv_dy1, dv_dy2);
18 printf('\n rpm = %.1f and approximate rpm = %.1f \n
    hp = %.5f ', rpm1, rpm2, hp);

```

---

#### Scilab code Exa 1.4 Chapter 1 Example 4

```

1 clear;
2 clc;
3
4 //page no.20
5
6 T = 70; //degreeF
7 del_p = 0.1; // in psi
8 sigma = 0.00498; // lb/ft
9 R = (sigma*2)/(del_p*144); // in ft
10 d = 12*2*R; // in inches
11 printf('Diameter of the droplet of water, d = %.4f
    in ', d);

```

---

#### Scilab code Exa 1.5 Chapter 1 Example 5

```
1 clear;
2 clc;
3
4 //page no. 20
5
6 l = 12; // length of the cylinder
7 T = 150; //temperature of water in degreeF
8 p1 = 14.52; //atmospheric pressure in psia
9 p2 = 3.72; //the pressure on the inside of the piston
   in psia
10 F = 0.25*(p1-p2)*%pi*l^2; //Force on the piston in lb
11 printf('Minimum force on the piston to be applied is
   , F = %d lb. ',F);
12
13 //there is an error in the answer given in textbook
```

---

# Chapter 2

## Fluid Statics

Scilab code Exa 2.1 Chapter 2 Example 1

```
1 clear;
